### ACCESSORIES

#### Technical Description

**Push button cock DKH:** Manually operated shut-off device between measuring line and pressure gauge in accordance with DIN 3537-1.

Normally closed, the pressure gauge is permanently relieved of pressure. The push-button is pushed in order to apply pressure on the pressure gauge and indicate the operating pressure.

#### Pressure gauge shut-off valve

**MAV:** Manually operated shut-off and flow control device between measuring line and pressure gauge in accordance with DIN 16270.

#### Application

Suitable for gases of gas families 1, 2, 3 and other neutral gaseous media.
